

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Previously Presented) A process for producing a decoration and a relief, corresponding to the decoration, at least on a top side of a woodbased-material board, the process comprising:

applying a cover layer of a synthetic resin to the top side of the woodbased-material board;

pressing in a press, by means of a pressing plate, the woodbased-material board with the cover layer of a synthetic resin which has previously been applied to the top side of the woodbased-material board, wherein the relief is stamped, during the pressing operation, by a female die which interacts with the pressing plate, and wherein the decoration and the relief are introduced simultaneously into the cover layer.

2. (Previously Presented) A process for producing a decoration and a relief, corresponding to the decoration, at least on a top side of a woodbased-material board, the process comprising:

applying a paper layer which is impregnated with melamine resin to the top side of the woodbased-material board;

pressing in a press, by means of a pressing plate, the woodbased-material board with the paper layer which is impregnated with melamine resin and has been applied

P27087.A05

beforehand to the top side of the woodbased-material board, wherein the relief is stamped, during the pressing operation, by a female die which interacts with the pressing plate, and wherein the decoration and the relief are introduced simultaneously into the cover layer.

3. (Previously Presented) The process according to claim 1, wherein the decoration is a wood decoration.

4. (Previously Presented) The process according to claim 1, further comprising coating the female die with ink before the pressing operation and producing the decoration by providing the relief with color.

5. (Previously Presented) The process according to claim 4, wherein the ink binds with the synthetic resin during pressing of the cover layer.

6. (Previously Presented) The process according to claim 1, further comprising, prior to applying the cover layer, applying a single-colored paper layer to the top side of the woodbased-material board, whereby the cover layer of synthetic resin is applied to the single-colored paper layer.

7. (Previously Presented) The process according to claim 1, further comprising providing the top side of the woodbased-material board with color before the cover layer is applied.

8. (Previously Presented) The process according to claim 1, further comprising applying to the relief a layer of ink.

9. (Previously Presented) The process according to claim 1, further comprising applying a multi-colored paper layer to the top side of the woodbased-material board.

10. (Previously Presented) The process according to claim 9, wherein the cover layer of synthetic resin is applied to the multi-colored paper layer.

Claims 11-14 (Canceled).

15. (Previously Presented) The process according to claim 2, wherein the decoration is a wood decoration.

16. (Previously Presented) The process according to claim 2, further comprising coating the female die with ink before the pressing operation and producing the decoration by providing the relief with color.

P27087.A05

17. (Previously Presented) The process according to claim 2, wherein the paper layer is a single-colored paper layer, and further comprising applying a cover layer of synthetic resin to the single-colored paper layer.

18. (Previously Presented) The process according to claim 2, further comprising providing the top side of the woodbased-material board with color and thereafter applying a cover layer.

19. (Previously Presented) The process according to claim 2, wherein the paper layer is a multi-colored colored paper layer.

Claim 20. (Canceled).

21. (Previously Presented) A process for producing a decoration and a relief that corresponds to the decoration at least on a top side of a woodbased-material board, the process comprising:

coating a female die with ink;

applying a paper layer to the top side of the woodbased-material board;

applying a cover layer of synthetic resin to the paper layer; and

pressing in a press, using a pressing plate and the female die, the woodbased-material board after being applied with the cover layer and the paper layer, wherein the

pressing causes the relief and the decoration to be simultaneously introduced into the cover layer and causes the ink to bind with the synthetic resin.

22. (Previously Presented) The process of claim 21, wherein the pressing causes melting of the synthetic resin and causes the ink to transfer to into depressions of the relief.

23. (Previously Presented) A process for producing a decoration and a relief that corresponds to the decoration at least on a top side of a woodbased-material board, the process comprising:

coating a female die with ink;

applying a paper layer impregnated with melamine resin to the top side of the woodbased-material board;

applying a cover layer of synthetic resin to the paper layer; and

pressing in a press, using a pressing plate and the female die, the woodbased-material board after being applied with the cover layer and the paper layer, wherein the pressing causes the relief and the decoration to be simultaneously introduced into the cover layer and causes the ink to bind with the synthetic resin.

24. (Previously Presented) The process of claim 23, wherein the pressing causes melting of the synthetic resin and causes the ink to transfer into depressions of the relief.
